WHY MOST PLANS FAIL

You know what to do. Doing it *alone* is the hard part.

01

Generic plans

Built for everyone, so they ignore your blood work and your week.

02

Nobody checking in

One busy week, a few missed days, and the plan quietly stops.

03

Data nobody reads

Your watch and apps collect numbers. Nobody acts on them.

THE TRIBE ELITE ANSWER

A team of experts around you, every day, so you are never doing it alone.

REAL MEMBERS, REAL RESULTS

YOUR CARE TEAM

Four experts. One plan. All *yours.*

LM

Lifestyle Manager

Owns your plan day to day. Reads your check-ins and adjusts your week.

DR

Doctor

Reads your blood reports with you on a call and flags what needs attention.

SN

Sports nutritionist

Builds your food around your training, your goal and your blood results.

CO

Coordinator

Watches your logs, sends reminders and makes sure nothing is missed.

One group chat with all four of them, inside the BodyBank app. Ask anything, any day.

YOUR FOUR MONTHS

From first test to *retest.*

1

MONTH 1

Assess and build

Your doctor reviews your blood report, you complete the nutrition assessment, connect your watch, and your plan is built.

2

MONTHS 2 – 3

Work the plan

Daily check-ins and meal snaps. Your team monitors, reminds and adjusts the plan every week.

3

MONTH 4

Retest and compare

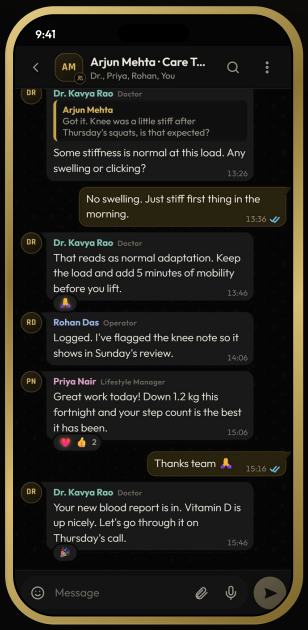

A new blood report and a full progress review show exactly what changed.
